Using ClassPad 300 Spreadsheet Application Tool

Prof. Dr. Lenni Haapasalo, University of Joensuu, Finland

Prof. Dr. Jozef Hvorecky, Vysoká kola manamentu, Bratislava, Slovakia

This booklet is aimed to be a basic material connected to our workshop in ICME 10 conference in Copengahen (<http://www.icme-10.dk>). Our purpose has not been to rewrite Class Pad Spreadsheet Application manual for giving a full coverage of Spreadsheet operations. Instead of this, we tried to pick up typical examples to combine a sophisticated use of Spreadsheets and modern views on teaching and learning of mathematics.

Authors:

Prof. Dr. Lenni Haapasalo (born 1950) is professor of mathematics education at the University of Joensuu (<http://www.joensuu.fi>). After working nine years as a mathematician, he has twenty-five-year experience in teacher education. His research interest is to develop practical theories based on deep understanding of modern constructivist views, especially concerning links between conceptual and procedural knowledge.

Prof. Dr. Jozef Hvorecky (born 1946) lives in Bratislava where he teaches on-site courses for Vysoka skola manazmentu (<http://www.vsm.sk>) – the first private Slovak university. He also teaches on-line courses for the KIT program of the University of Liverpool (<http://www.kitcampus.com>). Using spreadsheets for better understanding of Mathematics and Computer Science notions is the most important among his scientific interests.
